SUBJECT: Guide to the changes introduced in Revision 2.3 of the ReMade Technical Standards

The following is a list of the changes made to the ReMade Technical Standards (from version 2.0 to version 2.3).

A copy of the Producers Technical Standard showing these changes is available at [ReMade Technical Standards \(Rev. 2.3 2026\) - ReMade](#) (additions in red and deletions in ~~red-strikethrough~~) to facilitate understanding.

Please note that, following the recognition of the ReMade scheme by EA (*European co-operation for Accreditation*) in July 2026, the official version of the Technical Standards is the English version, available at https://www.remade.it/en/certification/remade-technical-standards-vers-2-3_2026/

PRODUCERS TECHNICAL STANDARD

- Section 3 (at the end): reference to the following documents: Annex to the Producers Technical Standard - Recognised Certifications; ReMade Technical Standards Revision Procedure.
- Section 3 (at the end): changes to the green box.
- Section 4.1: the Conformity assessment body must send the Certificate to the company and simultaneously to ReMade.
- Section 4.2.2(g) and Section 4.3.2.1: indication of origin from post-consumer waste.
- Section 4.2.2(h): byproducts removed from the requirement to provide EWC codes.
- Section 4.2.6: the internal auditor must have completed the dedicated ReMade course.
- Section 4.3.2.1 (with reference to Annex 1): the list does not provide examples and is to be regarded as exhaustive; case-by-case application has been removed and a requirement to provide evidence in the Audit Report has been added.
- Section 4.3.2.2: references to Italian legislation have been removed; the reference to the information sheet under Decree No. 264/2016 has been removed (although all the topics covered therein are retained), as has the requirement to submit it to the Chambers of Commerce; a provision concerning excavated soil and rocks has been added.
- Section 4.3.7: mass balance $> (A/P) \times 100$ (the minimum required by tenders must always be ensured).
- Section 4.3.8: the mass-balance calculation has been removed; the register has been added.
- Section 6.1: addition of products during the certification cycle: documentary review only for products belonging to the same family (otherwise an on-site audit is also carried out); a local technical expert is required for audits outside Italy.
- Section 6.1.1: new section.
- Section 6.1, Table 1: fees for audits outside Italy have been removed.

- Section 6.1, Table 1, notes - Supplier scope extension fee: an increase of 0.5 (rather than 1) for each supplier audited. Audits of the different production sites are mandatory in the first year only where different processes are carried out.

PRODUCERS TECHNICAL STANDARD - ANNEX

- New

CONFORMITY ASSESSMENT BODIES TECHNICAL STANDARD

- Section 2.2.1: reference to PEFC accreditation removed.
- Section 2.2.1: accreditation issued by ASI removed.
- Section 4.3: reference to the UNI 19011 standard removed.
- Section 4.4 (first part): references to the UNI 19011 standard removed.
- Section 4.4 (second part): minor non-conformities removed.
- Section 4.4 (second part): typographical error corrected (the recommendations are assessed by the Conformity Assessment Body, not by the Foundation).
- Section 4.6: cross-reference to Section 6 of the Producers Technical Standard.
